SKIN EVALUATION AND PARTICIPATION STATUS

(Physician Release for Student-Athlete to Participate with Skin Lesion)

Student-Athlete: _____

Date of Exam: ____ / ____ / ____

Institution: _____

Please Mark Location of Lesion(s):

Dual(s)/Tournament: _____

Number of Lesion(s): _____

Cultured: No Yes _____

Diagnosis: _____

Medication(s) used to treat lesion(s): _____

Date Treatment Started: ____ / ____ / ____ Time: _____

Earliest Date student-athlete may return to participation: ____ / ____ / ____

Physician Name (Printed): _____

Physician Signature: _____

(M.D. or D.O.)

Specialty: _____

Office Address: _____

Contact #: _____

Institution Certified Athletic Trainer Notified: No Yes Signature: _____

Note to Providers: Non-contagious lesions do not require treatment prior to return to participation (e.g. eczema, psoriasis, etc.). Please familiarize yourself with NCAA Wrestling Rules which state: (refer to the NCAA Wrestling Rules and Interpretations publication for complete information)

"9.6.4 ... The presence of a communicable skin disease ... shall be full and sufficient reason for disqualification."

"9.6.5 ... If a student-athlete has been diagnosed as having such a condition, and is currently being treated by a physician (ideally a dermatologist) who has determined that it is safe for that individual to compete without jeopardizing the health of the opponent, the student-athlete may compete. However, the student-athlete or his/her coach or athletic trainer shall provide current written documentation from the treating physician to the medical professional at the medical examination, ..."

"9.6.6 ... Final determination of the participant's ability to compete shall be made by the host site's physician or certified athletic trainer who conducts the medical examination after review of any such documentation and the completion of the exam."

Below are some treatment guidelines that suggest **MINIMUM TREATMENT** before return to wrestling: (please refer to the NCAA Sports Medicine Handbook for complete information)

Bacterial Infections (Furuncles, Carbuncles, Folliculitis, Impetigo, Cellulitis or Erysipelas, Staphylococcal disease, CA-MRSA): Wrestler must have been without any new skin lesion for 48 hours before the meet or tournament; completed 72 hours of antibiotic therapy and have no moist, exudative or draining lesions at meet or tournament time. Gram stain of exudate from questionable lesions (if available). Active bacterial infections shall not be covered to allow participation.

Herpetic Lesions (Simplex, fever blisters/cold sores, Zoster, Gladiatorum): Skin lesions must be surmounted by a FIRM ADHERENT CRUST at competition time, and have no evidence of secondary bacterial infection. For primary (first episode of Herpes Gladiatorum) infection, the wrestler must have developed no new blisters for 72 hours before the examination; be free of signs and symptoms like fever, malaise, and swollen lymph nodes; and have been on appropriate dosage of systemic antiviral therapy for at least 120 hours before and at the time of the competition. Recurrent outbreaks require a minimum of 120 hours of oral anti-viral treatment, again so long as no new lesions have developed and all lesions are scabbed over. Active herpetic infections shall not be covered to allow participation.

Tinea Lesions (ringworm): Oral or topical treatment for 72 hours on skin and 14 days on scalp. Wrestlers with solitary, or closely clustered, localized lesions will be disqualified if lesions are in a body location that cannot be adequately covered.

Molluscum Contagiosum: Lesions must be curetted or removed before the meet or tournament and covered.

Verrucae: Wrestlers with multiple digitate verrucae of their face will be disqualified if the infected areas cannot be covered with a mask. Solitary or scattered lesions can be curetted away before the meet or tournament. Wrestlers with multiple verrucae plana or verrucae vulgaris must have the lesions adequately covered.

Hidradenitis Suppurativa: Wrestler will be disqualified if extensive or purulent draining lesions are present; covering is not permissible.

Pediculosis: Wrestler must be treated with appropriate pediculicide and re-examined for completeness of response before wrestling.

Scabies: Wrestler must have negative scabies prep at meet or tournament time.

DISCLAIMER: The National Collegiate Athletic Association shall not be liable or responsible, in any way, for any diagnosis or other evaluation made herein, or exam performed in connection therewith, by the above named physician/provider, or for any subsequent action taken, in whole or in part, in reliance upon the accuracy or veracity of the information provided herein.
