Individual Collegiate Records

Official NCAA men's lacrosse records began with the 1971 season and are based on information submitted to the NCAA statistics service by institutions participating in the weekly statistics rankings, which started in 1996. Individual collegiate leaders are determined by comparing the best records in all three divisions in equivalent categories. Players whose careers were split between two divisions are also included. In statistical rankings, the rounding of percentages and/or averages may indicate ties where none exists. In these cases, the numerical order of the rankings is accurate.
