Individual Records

The format of a match changed in 2008. The term "game" was changed to "set." In addition, scoring for those sets moved from 30 points to 25 points, except in matches that go to the full five sets, in which the fifth set is still played to 15.

The match format previously changed in 2001, with scoring for each set moving from 15 points to 30 points, except in matches that went the full five sets, in which the winning score again remained at 15.

In reflection of these changes, category leaders under the different scoring formats are separated in order to avoid eliminating the achievements of those student-athletes who played under the previous formats.

Official NCAA volleyball records began with the 1981 season and are based on information submitted to the NCAA statistics service by institutions participating in the statistics rankings. In statistical rankings, the rounding of percentages and/or averages may indicate ties where none exists. In these cases, the numerical order of the rankings is accurate.

In 2011, individual season blocking categories were added for seasons since 2001. Research continues on single match and career data for those seasons. Information on blocking from 1981 to 2000 has not been included in the following records since there appeared to be a significant variance in the methods by which blocking statistics were kept during those years.

Official career records include players whose career statistics were recorded during the era of official NCAA play.

Team Records

Official NCAA volleyball records began with the 1981 season and are based on information submitted to the NCAA statistics service by institutions participating in the statistics rankings. In statistical rankings, the rounding of percentages and/or averages may indicate ties where none exists. In these cases, the numerical order of the rankings is accurate.

In 2011, team season blocking categories were added for seasons since 2001. Research continues on single match data for those seasons. Information on blocking from 1981 to 2000 has not been included in the following records since there appeared to be a significant variance in the methods by which blocking statistics were kept during those years.
